

Karori 2017 Ram Sale Catalogue

Saturday 28th January 2017 at 1.00pm. Rams can be inspected from 10am.

The 2017 year was extremely challenging as we missed our summer rainfall and fed stock from March through to October. It continues to be extremely dry in the east and we ended 2016 with an annual rainfall deficit of approximately 200mm. The difficult seasonal conditions impacted on our CVs and SDs which were much higher than normal so the 2017 sale team has been re-tested for FD, FDCV and SD.

All the rams in the sale team were re-tested on the 9th January and the avg FD was 16.7u with avg Standard Deviation (SD) of 2.6 and average FDCV of 15.9.

The rams are looking very good and are extremely good for their all-round traits and their ability to breed high quality progeny.
